Application Serial No. 10/723,283 Attorney Docket No. 915-007.061

Enclosed is a Form PTO-1449 listing the cited references. A copy of the cited references are also enclosed herewith. The pages from the web site www.myorigo.com disclose switching the orientation of a display in a mobile phone when the mobile phone is rotated. The rotation of the mobile phone is detected by motion sensors that are integrated in the mobile phone. This approach is discussed in the opening part of the description of the present application. The pages from the web site www.telme.at present the T919 mobile phone from tel.me. In the description of the display, it is said that the display can be switched between portrait format and landscape format. It is not disclosed how this switching is implemented. An approach wherein the display format can be switched by pressing a hard key or by browsing a display menu is discussed in the opening part of the description of the present application as well, even though the web pages themselves for both web sites are not explicitly cited in the application.

This IDS is being submitted prior to receipt of a first Official Action in this matter; therefore, the undersigned respectfully submits that no fee is due for filing this IDS. The Commissioner is hereby authorized to charge to deposit account 23-0442 any fee deficiency required to submit this IDS.
